

Guidelines for series approval of products for Power Bank for use in portable applications

Product	Up to a range of capacity rating will be accommodated in the series, provided
With External Adapter	<ul style="list-style-type: none">• Same rated input voltage• Same class of construction• Same degree of ingress protection• Same PCB design and layout• Same battery / cell Type• Same material characteristics for enclosure
With in-built Adapter	<ul style="list-style-type: none">• Same rated input voltage• Same degree of ingress protection• Same mains PCB design and layout• Same battery / cell Type• Same charging circuit• Same material characteristics for enclosure

Guidelines for Quantitative Selection of Samples

- A series may consist of 10 models.
- Unless specified otherwise, one sample may be tested for each series.
- In any of the above consideration, worst case configuration from Safety Design perspective must be selected for testing.
