

Guidelines for series approval of products for Smart Watches

Basic Configuration	Grouping as one series provided product has
Smart Watches (with or without display)	<ul style="list-style-type: none">• Same input voltage and current• Same enclosure except for differences of decorative parts• Same battery nominal voltage and capacity• Same rated input voltage, class of construction of adapter• Adapter to be BIS registered with same rated input voltage with/without display in separate Series.
	<ul style="list-style-type: none">• Smart watches with SIM are covered under the Mobile phones category. However, smart watch, with SIM facility, which do not have text input capability would fall under category of Smart Watch.

Guidelines for Quantitative Selection of Samples

- A series may consist of 10 models.
- Unless specified otherwise, one sample may be tested for each series.
- In any of the above consideration, worst case configuration from Safety Design perspective must be selected for testing.
